ABOUT THE MODELS

Thanks for taking a look at the MadMan's Shipyard catalog! For about 15 years, I've been building CGI Sci-Fi models, but I started turning them into 3D printed physical models about 5 years ago.

The models in this catalog are available as a finished model, or as a model kit. Each model is 3D printed on demand in my shop in Florida using ABS plastic, a type of styrene. Larger and additional photos are available on the MadMan's Shipyard Facebook page, or by request. Shipping is included in all prices, except for international orders.

I use a PayPal invoicing system, which accepts all types of credit and debit payments.

I also take requests! Send me any ideas about your own custom designs, they can become models kits too!

-Ricky
